- Organisers** Nordic Association for Educational and Vocational Guidance, NFSY; The Danish Joint Council of Organisations for Educational and Vocational Guidance, FUE; Danish University of Education, DPU, in collaboration with IAEVG. Sponsored by the Danish Ministry of Education.

### The Backdrop

The concept of *crossover* exists in art (fusion music), in food (fusion kitchen), and in other cultural phenomena, such as language, ethnicity, and perhaps even gender. Individualism and multicultural crossover phenomena go hand in hand. In a global society, cultures mix, they cross. This also applies to career guidance.

**Association internationale d'orientation scolaire et professionnelle**  
**International Association for Educational and Vocational Guidance**  
**Internationale Vereinigung für Schul- und Berufsberatung**  
**Asociación Internacional para la Orientación Educativa y Profesional**

In career guidance and career development, crosscurrents and crossover phenomena take many forms, and guidance faces the challenges of becoming increasingly:

- cross-cultural: across cultural barriers, multicultural
- cross-national: across national boundaries
- cross-medial: across different media and various forms of ICT
- cross-clusive: across social inclusion/exclusion, in terms of gender, ethnicity & age
- cross-methodological: across and beyond well-established guidance methods
- cross-theoretical: across and beyond well-established guidance and career development theories

### ***Across the water***

This is what this conference is about: *crossover*. Thus, it takes place on both sides of the Öresund, the stretch of water that links Denmark and Sweden. Two days, Day 1 & 3, are devoted to keynotes and workshops; one day, Day 2, is a day for study visits to career guidance centres, projects, activities, HRD – focused on crossover guidance.

### ***Keynotes***

Two prominent scholars in the guidance field, Dr Peter Plant, Denmark, and Dr Norman Amundson, Canada, will deliver the key-note speeches, by introducing and discussing the concept of crossover phenomena in guidance. They are both well known for thinking out of their boxes – if they ever had any.

### ***Workshops***

The workshops will run throughout the conference and they will relate strictly to the conference theme and the sub-theme under which your input comes. The Scientific Committee will select among the submitted papers on this basis. We invite you to think out of your usual box, and cross into uncharted waters, thus stimulating the development of both the practical and the theoretical aspects of guidance.
